Assignment 4 - Decision Structures and Boolean Logic

Professor AllyBaba wants to find the letter grade and display a comment based on the entered numeric grade.

Based on the numeric grade he wants to output a message.

      If grade is 90 or more
            Letter Grade A – "I am Genius!"
      If grade is between 80 and 90
            Letter Grade B – "I am Good worker"
      If grade is between 70 and 80
            Letter Grade C – "I am Barely Average"
      If grade is between 60 and 70
            Letter Grade D – "I am not doing my work"
      If grade is below 60
            Letter Grade F – "I will try Next Time"

AllyBaba will enter the numeric grade. The program will display the appropriate letter grade and comments.

Make sure to include appropriate labels.
Use following functions
    getData()
    processData()
    main()
